EU–Australia economic cooperation is entering an ambitious new phase. This is taking place in the context of the shifting international economic landscape and there is an increasing focus on climate change as an absolute priority. Technological advances and global value chains have redefined traditional flows of goods, capital and services across borders and tested the limits of established international institutions of economic cooperation. The COVID-19 pandemic has, of course, added additional complexities to these relationships.

The Centre of Excellence focuses very practically on such emerging issues and aims to explore them in the developing EU-Australia relationship. One particular concern will be the increased policy attention to domestic supply capability across a range of essential goods and services. Comparing EU Member States and Australia offers interesting contrasts in approaches across different policy issues and provides useful material to explore their effectiveness. It will be important in these policy debates to ensure that the important competitive advantages of the free trade agenda are not ignored.

The Centre's principal objective is to identify opportunities for the EU and Australia to progress the bilateral economic relationship and to pursue shared objectives in regional and multilateral contexts.

We are seeking a Visiting Fellow to assist the ANUCES in undertaking research to explore relevant issues within this broad theme. Primarily, the Visiting Fellow will identify and undertake a project that will provide a solid academic basis for such policy debates. Ideally, this work will be undertaken between 1 July 2020 and 31 December 2020. The Visiting Fellow will be required to present their research in the form of a masterclass and a webinar for stakeholders promoting realistic policy actions.

As travel to Australia is currently impossible, the ANUCES will provide up to 4,500 Euro towards travel in 2021 for the Visiting Fellow to present this work at appropriate professional/academic conference(s) and to undertake discussions with policy advisers and other leading researchers to advance the policy relevance of the work. The research should finally be presented in an ANUCES Briefing Paper. It could also be developed into academic publications.

Co-funded by the

National
University

ANU CENTRE FOR EUROPEAN STUDIES

ANU College of
Arts & Social Sciences

The ANU Centre for European Studies (ANUCES) is the oldest research centre in Australia focused on the study of Europe and the European Union. It is an ANU-wide platform for research and collaboration with Europe, with strong links to government and industry. ANUCES focuses the talents of hundreds of researchers, teachers and students on a single site and proudly promotes interdisciplinary dialogue. It delivers research, education and outreach with the support of the Erasmus+ Programme of the European Union.
